

Survey

A survey is an action request for a Surveyor to look at and document the status of fixtures on a property or part of a system. A surveyor can be anyone that is able to determine the operational status of a fixture.

Surveyors can Add Images, Edit Fixture Details like Model and Serial Numbers, or decide the Fixture does not exist on site. Fixtures that are inherited from Property Templates may not exist at every location, and therefore need to be removed during the survey.

Revision #2

Surveyor for Joel's Properties II
Sytewise Surveys
USER: Test Surveyor
